The url of the project: http://5.75.182.107/~bgazanfar

//The website access for forbidden while we were trying to get the url so url cannot be precise

The logo of our project:

When users enter the site they see the search section in front of them. In there, they are able to search for a particular city, restaurant, date and rating of the restaurant. Additionally, above it in the header section users see two options named favorites and login. Below search section, there are two more sections which are recommended and most viewed restaurants. In those sections several restaurants and cafès will be listed for advertisement and recommendation purposes. Eventually, there is a footer, in which the link to imprint page is located , at the bottom of the page for additional information.
